

Power industry challenges and the need to innovate

Peter McIntyre, Managing Director

16 November 2015

About TransGrid

Keeping you and your way of life connected - 24/7

Renewable Energy Hub

New England
region

NSW

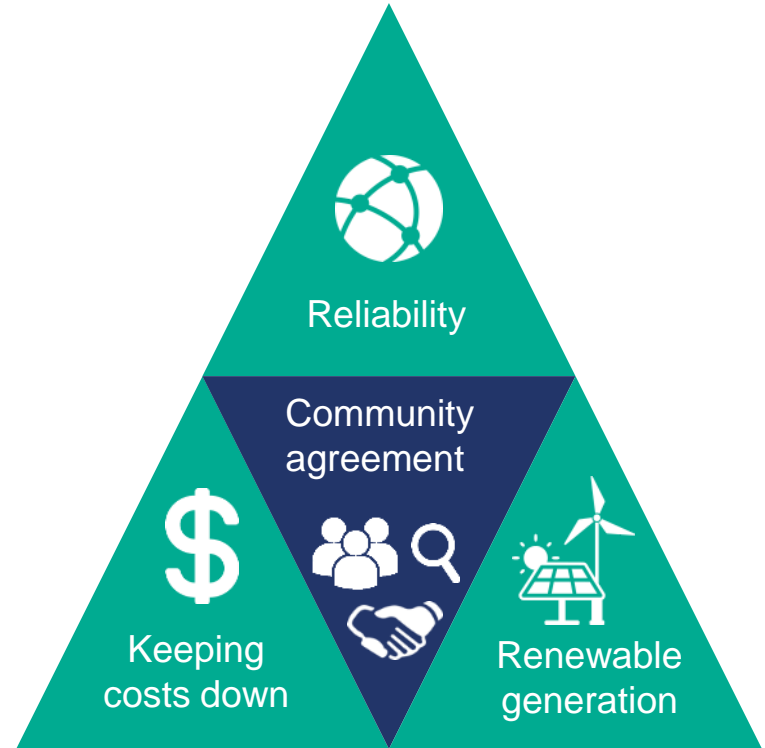

Our Renewable Energy Hub could bring 700MW additional connections to a constrained area

Active in research and development

Committed to driving grid innovation, we are exploring ways to integrate storage

A low carbon future

Delivering infrastructure excellence

Manufactured in
Germany

Constructed in
Adelaide

Installed in Orange

Innovative solutions for customers

More than a network

The evolving energy ecosystem brings new opportunities for the power industry. In driving forward innovation, TransGrid is ready for the challenge ahead.
