

Rosalyn W. Berne Director, Center for Engineering Ethics and Society (CEES), National Academy of Engineering. As CEES director, Dr. Berne is working on various projects such as ‘engineering ethical approaches to the problem of plastic pollution in the ocean’ and ‘transforming ethics education through the Online Ethics Center (OEC) for Engineering and Science.’ As Associate Professor of Engineering and Society at the University of Virginia's School of Engineering and Applied Sciences, Berne teaches

Social and Ethical Implications of The Engineering Grand Challenges and a graduate seminar in The Responsible Conduct of Research. As a scholar she explores the intersecting realms of emerging technologies, science, fiction and myth, and the links between the human and non-human worlds. She has two academic books, numerous conference papers and journal articles, a science fiction novel, and two award-winning books in the body-mind-spirit genre.
