

Aurelie Jacquet is the Chief Legal and Data Ethics Officer at Innovations Accelerated in Sydney, Australia, and the founder of the professional working group, 'Ethics for AI and Automated Decision Making (***Ethics for AI***)', that will soon incorporate as a not for profit organisation. The aim of 'Ethics for AI', is to help define what ethical frameworks should be required for AI to automate decision making processes.

Some initiatives Aurelie is currently leading on Ethics & AI:

Aurelie is leading the workstream on Dignity and Agency for Identity as part of the global IEEE Digital Inclusion through Trust and Agency (DITA) program.

She successfully submitted an application for Australia to participate in the International Standard (ISO/IEC JTC1/SC 42) on artificial intelligence (***the AI ISO***), and will be a member of the new Australian national committee to mirror the AI ISO

She is also a member of:

'The Australian AI Working Group', that is set up by *Standards Australia* with the aim to become the preeminent forum for exploration and discussion of AI by engaging both government and industry;

The global IEEE s' working group for Standard P7000 *'Model Process for Addressing Ethical Concerns During System Design'*; and

The European AI Alliance, a forum established by the European Commission.

Separately from her initiatives around Ethics and AI, Aurelie is a practising lawyer with over 10 years' experience in Financial Services. Before that she was a litigator at top tier Australian law firms. She obtained her postgraduate and undergraduate degrees from both France and Australia.
