

EDKCON 2024 Design Contest Rules

Eligibility Requirements:

All University/College Students including UG, PG and PhD are eligible and encouraged to participate.

Students must apply via the online submission to be eligible to participate.

More than one design may be submitted from students from one institution. At large student members may collaborate with each other even if they do not attend the same institution.

Copyright

All submissions to the competition shall be the original work of the team members.

Authors retain copyright ownership of all written works submitted to the competition.

Basis for Judging

Judges reserve the right to not award all three places. Judges' decisions are final, and candidates will be provided feedback via judging comments after the program has closed for the cycle.

1. **Technical Content (35 points)**

This concerns the correctness of theory, validity of reasoning used, apparent understanding and grasp of the subject, etc. Are all major factors considered and a reasonably accurate evaluation of these factors presented?

2. **Organization and Presentation (20 points)**

The description of the design as an instrument of communication is a strong factor on judging. Organization and presentation of the design, clarity, and inclusion of pertinent information are major factors.

3. **Originality (20 points)**

The design should avoid standard textbook information, and should show the independence of thinking or a fresh approach to the project. Does the method and treatment of the problem show imagination? Does the method show an adaptation or creation of automated design tools?

4. **Practical Application (25 points)**

The proposal should present conclusions or recommendations that are feasible and practical, and not merely lead the evaluators into further difficult or insolvable problems.
