IEEE WIE FORUM USA EAST

MESSAGE FROM THE CHAIRS

As Vice Chair of the 9th Annual IEEE WIE Forum USA East, I am thrilled to extend a warm invitation for you to join us from November 7-9 at the Stamford Marriott Hotel & Spa in Stamford, Connecticut.

Our theme, "Own Your Power Skills," is a powerful Call to Action for all women to embrace and cultivate their unique strengths. This year's forum is not just about recognizing your potential, but about mastering and leveraging your skills to achieve your dreams and make a significant impact in your field. By honing your power skills, you can transform challenges into opportunities and setbacks into stepping stones.

Remember, owning your power skills is about more than just professional development—it's about personal empowerment and realizing that you have the ability to shape your destiny. We encourage you to take this opportunity to network, learn, and grow with us. Whether you participate as a speaker, register as an attendee, or support the conference as a sponsor, your involvement is crucial to the success of this event.

Let's come together to inspire, support, and uplift one another as we navigate our paths to success.

Regards,

Rhonda Green

ISSUE 4 | JUNE 2024

INTERNATIONAL WOMEN IN ENGINEERING DAY - JUNE 23

Book by June 9, 2024 to guarantee your spot onboard IEEE-USA's 7-night Alaska Cruise September 9-16, 2024 on Royal Caribbean's Quantum of the Seas.

INTERNATIONAL WOMEN IN ENGINEERING DAY JUNE 23, 2024

2024 IEEE WIE DAY

The IEEE Women in Engineering (is excited for their 2024 IEEE WIE Day celebrations to begin on 23 June to coincide with the 'International Women in Engineering Day.'

WIE calls on its members, Affinity Groups, and Student Branch Affinity Groups to organize their events to take place beginning 23 June until 12 July 2024. This is a great opportunity for the local Affinity Groups and the Student Branches to co-organize events.

With an overarching theme of Engaging More Women in AI and 4IR Technologies, WIE is dedicated to encouraging women and men to support the advancement of women in STEM across the globe!

Fun Fact: IEEE Women in Engineering was formally established on 29 June 1997.

FAMOUS WOMEN ENGINEERS

Own your Power Skills in 2024! This IEEE WIE Day, be inspired by these history-making engineers who showcased the diverse power women bring to engineering, from innovation to leadership.

1. Hedy Lamarr, the glamorous Hollywood actress, was also a brilliant inventor who co-developed a frequency-hopping communication system,
2. Edith Clarke, a groundbreaking electrical engineer, devised a method to analyze power systems, enabling longer distance electricity transmission and laying the groundwork for today's vast electric grid.
3. Lillian Gilbreth, a pioneer of scientific management, used time studies and championed worker well-being to find the most efficient, least tiring way to complete tasks.
4. Kate Gleason, the "First Lady of Gearing," was an American engineer and businesswoman who rose through the ranks of her family's machine tool business and became a leader in her field, even without a formal degree.
